

SOFTWARE ENGINEER

Francesco Scocco | +39 351 602 5245 | francesco.scocco.dev@gmail.com | [Linkedin](#) | [Github](#) | [Website](#)

PROFILE

Full-Stack Software Engineer with 3+ years of experience building scalable backend systems and modern web applications. Experience delivering solutions for large enterprises (ENI, Bauli, IBSA). Recently focused on designing AI agent architectures using Python.

Strong interest in distributed systems, AI, and high-performance applications. Passionate about solving complex problems and building impactful products.

TECHNICAL SKILLS

Language	C# .NET, ASP.NET, Python, React, React Native, JavaScript, TypeScript
Database	SQL Server, MongoDB, Redis
AI/LLM	LangGraph, PydanticAI, LangSmith, Ollama
Tools	Azure, Git, GitHub, Bootstrap, API, Crystal Reports

PROFESSIONAL EXPERIENCE

April 2026 – present

AI Engineer — Itworks Srl

- Designing and developing custom multi-agent AI architectures in Python, replacing manual workflows with autonomous intelligent systems
- Leveraging LangGraph, PydanticAI, and LangSmith to build production-grade agentic pipelines capable of tool use, state management, and complex orchestration
- Overcoming limitations of off-the-shelf AI solutions by building tailored architectures for enterprise use cases

Jan 2023 – present

Software Engineer — Itworks Srl

- Delivered enterprise software solutions for ENI Spa, Bauli Group, and IBSA
- Designed and implemented scalable backend systems using C# .NET, ASP.NET Core, and SQL Server
- Built modern frontend interfaces with React and React Native
- Translated complex business requirements into high-performance, production-ready applications

CERTIFICATIONS

2026
2023
2023
2023

Google and IBM AI Certification — Coursera
ASP.NET C# Developer — Itworks
React.js Developer — Aulab
Full-Stack Developer — Aulab
PET – Preliminary English Test (Cambridge)
ECDL – European Computer Driving Licence

EDUCATION

2022

Diploma in Mechatronics and Design

Background in industrial systems and automation, contributing to a structured, performance-oriented approach to building enterprise software solutions.
